AResume:
# A Web-based Resume Generator With Augmented Reality Features

Introduction

Problem Statement

- Lack of experience of fresh graduates in building resume

- Attempt one-size-fits-all approach

- Tedious work in drafting, formatting and writing resume

Aim & Objectives

- To study a comparative analysis of the existing online resume generators

- To develop a web-based application to generate an augmented reality resume

- To test the usability of the application with user acceptance testing

Results

Existing & Proposed System

Methodology (RAD)

Future Implementations
